

AI.4.educators

Background

The project AI.4.educators was conceived to shed light on the technological advancements on AI and its incorporation in modern life in various forms and applications.

#Ai4educators #innovation #artificialintelligence #machinelearning #onlinecourses #education

Objectives

The project aims to achieve the following objectives:

- Strengthening the engagement of educators with AI field
- Cultivating a Eurocentric approach on AI
- Developing a high-quality educational curriculum
- Adopting personalization and interaction tools
- Enhancing educators' digital skills
- Creating an online AI academy

Expected Outcomes

The project will have the following results:

- Digital Learning Platform for hosting the AI educational program in the form of e-courses
- Digital Survey for Detecting Training Needs of Educators on AI
- AI Training Material including (i) a Practical, (ii) a Legal, and (iii) an Ethical AI Roadmap

Current Steps

The project team has already finalized the first part of the project, which is the implementation of the survey. More specifically, we have received 49 replies from adult educators on the field of Artificial Intelligence, which formed important feedback for deciding the training material that the e-courses will later contain. Within November 2022, the project team is planning to finalize and upload this training material in order for the Digital Learning Platform to be ready to be used.
